bambrella®

For a Greener World

# WHY BAMBRELLA® ?

- Revolutionary new concept for the outdoor leisure industry.
- 5 year guarantee on frames and hardware.
- Patented designs and technology
- Ecologically sound.
- Extremely robust and weather resistant
- Sizes from 2 to 4 meters.
- Beautiful natural wood look and feel with sleek, modern design.
- Quality 304 stainless steel fittings.
- Specialised bamboo laminating technology.
- Protective oil finish enhancing the beautiful deep golden colour whilst keeping the natural feel.

# WHY BAMBOO?

- A large percentage of wooden parasols are made from unsustainable wood.
- Non toxic and non hazardous to the environment.
- Sustainable and renewable.
- Superior density, strength and hardness compared to most hardwoods.
- Bamboo is the fastest growing plant in the world, able to grow on 80% of the worlds surfaces.
- Bamboo absorbs more CO<sub>2</sub> than any other plant or tree.
- Minimizes impact on the environment.
- 100% solid laminated Moso bamboo strips.
- No illegal logging or deforestation.
- Naturally strong and very durable, with a tensile strength similar to steel.
- Resistant to warping, splitting, rot, mould and mildew.
- No splinters or leaching.
- Exemplary quality with a passion for detail.
- Natural beauty with sleek, clean lines.

# WELCOME ABOUT US

Bambrella® Ltd was formed by the director of the Woodstocks International Group of companies who have been manufacturing garden furniture and parasols in Indonesia since 1996. Prior to this the director was a wooden boat builder. The wealth of experience gained over the years in this industry, inspired me to invest time and resources into the research and rigorous testing of materials, in order to produce a superior parasol product. We use unique patented designs and innovative technology to manufacture parasols of unsurpassed quality. Bambrella® parasols are made in our own factories, enabling us to strictly monitor quality control so that we consistently produce the best parasols on the market.

In 2010 we expanded our manufacturing operation into China and began the manufacture of Bambrella® parasols there. The reason for the move from Indonesia was the plentiful supply of superior Moso bamboo, which we found to be the only bamboo which could be processed and treated for outdoor use, as well as being available with FSC certification.

Bambrella® has proven to be the highest quality laminated bamboo parasol on the market. One of the reasons is its ability to resist the inherent problem inferior products have of mould and mildew occurring when bamboo is exposed to the elements. This effective resistance has taken years of testing to overcome. Another reason is the patented joint system which enables us to hot press and glue long lengths of laminations. These innovations make it very difficult for other manufacturers to replicate the quality of Bambrella®. Independent laboratory-testing has been conducted for mould and mildew defence and the ability to prevent de-lamination. This gives us, and our customers, confidence in this fine product.

Our mission is to supply commercial, contract and domestic users with a strong, durable well-designed parasol which will last, whilst maintaining a natural wood look, finish and feel. At Bambrella® we constantly look to improve and enhance our product range and we are designing and testing an exciting new range of outdoor furniture using high-quality modern materials combined with bamboo. The materials used in the production of our outdoor furniture and umbrellas are known to be the best available so that they can withstand the many differing climates and conditions around the world where our products are found.

A handwritten signature in black ink, reading "Rupert Bottomley". The signature is written in a cursive, flowing style.

Rupert Bottomley, Director  
Bambrella®

## Bambrella® and the environment

Bambrella® is a certificate holder in the Forest Stewardship Council (FSC®) scheme and we endeavour to source our bamboo through FSC® certified forests. This ensures that our bamboo is well managed, and protects local communities and natural wildlife.

All the materials used in the production of our umbrellas are 100% recyclable. The oil finish we use has a low VOC and the bamboo is dipped rather than sprayed. The glues we use are European and are rated well within the EU, E1 standard. Recycled materials are used for packaging where possible. All this helps keep the impact of manufacturing on the environment to a minimum. At Bambrella® we understand our social responsibilities and require our international partners to adhere to high levels of welfare, far exceeding local labour standards.

## Bamboo information

The process of producing Bambrella® parasols starts with the careful selection of the bamboo. After years of research and rigorous testing we found Moso bamboo to be the only species suitable for outdoor use. The characteristic of Moso bamboo which set it apart from over a thousand other species is the size of the individual fibre strands. These strands are much smaller and more tightly condensed and are similar to the structures in fine grained hardwoods like teak. We found other bamboos that had larger strands and were not so tightly condensed were more like softwoods, as the fibres/strands would peel individually.

## Wind tunnel testing

To ensure the reliability of our parasols, **we have tested all the different ranges of parasols in a full size wind tunnel up to 109km/h.** Our new range of aluminium parasols have also been tested in a **wind tunnel at speeds up to 109km/h.**

Bambrella® Levante is our premium and most popular parasol, designed for the commercial and high-end domestic markets. It is made using a single piece pole for extra strength and durability, and has simple, clean classic lines, with the contemporary feel of stainless steel and natural bamboo. Our double pulley and rope system ensures easy raising and lowering of the parasols, even on the largest of models.

The Levante range incorporates a turned bamboo hub and runner with stainless steel brackets, a bamboo finial, and an elegant, practical hour glass shaped pin made from bamboo and stainless steel. The covers are attached using our own bolt-down stainless steel rib end protector system or alternatively sewn pockets. The ribs and supporting arms are fitted with stainless steel through bolts, making all the parts easily interchangeable.

The Levante Side Wind range is our range of large side pole umbrellas, manufactured and designed to exacting standards with durability, strength and style in mind - the three key points of all Bambrella® products. The Side Wind features a 360° rotating base and 45° tilt so you can still find shade as the sun goes down.

The base has adjustable feet for uneven surfaces whilst protecting the floor at the same time. We use a specialized type of polymer for the bearings meaning that they never seize up or rust.

This umbrella was designed for both commercial and domestic use, bringing a magnificent focal point for any situation. We can also supply this parasol with a ground base.

The Sirocco is designed for the commercial and domestic markets with the Bambrella® three key points of design - durability, strength and style. The main feature of the Sirocco is the use of nylon for the hub and runner, which have built in rollers for the rope pulley system and a patented locking cleat. This clamps the rope so there is no need for the use of a pin to hold the canopy up.

The smaller sizes of the Sirocco can have a two piece pole using a 304 stainless steel connector allowing for easy storage and trans portation.

The Sirocco, like all of our other ranges, has easily changeable parts.

Levante telescopic

The four metre telescopic is our largest parasol and it is designed so it will still close over the height of a table. It is a stunning parasol and perfect for commercial use, when needing to shade a few tables. We make this parasol using either the Levante hub and runner or the nylon Sirocco hub and runner.

Sirocco telescopic

# ALIZE

# Technical Data - Alize

1 = total height  
2 = frame height

**Material frame:** The pole, posts, ribs, hub, runner and finial are all made using laminated bamboo. All metal fittings are 304 stainless steel. The feet, corner bracket and rib bracket are made from e-coated then powder coated steel.

Shape	Code	Size	Total height	Frame height	Pole size	No of ribs	Size of ribs

The impressive Alize pavilion range is the ultimate luxury space for entertaining and relaxing alike. For those wanting more privacy you can close the drapes on all four sides. The Alize is extremely robust and can be used as a permanent or temporary structure. The feet at the bottom of the pole The Yacht range has a stainless steel pole used with a canopy from either the Levante, Infinity or Sirocco range giving a more contemporary look whilst still keeping the strength.

A lot of Bambrella's design and construction come from a wooden boat building background and the use of stainless steel and wood/bamboo have always given a nautical feel. sts can be fixed to any surface using bolts, screws, pegs or you can use our concrete filled bamboo bases. Like all Bambrella® products the Alize is designed for both commercial and domestic use, and this being the strongest design of shade in our collection.

# YACHT

The Yacht range has a stainless steel pole used with a canopy from either the Levante, Infinity or Sirocco range giving a more contemporary look whilst still keeping the strength.

A lot of Bambrella's design and construction come from a wooden boat building background and the use of stainless steel and wood/bamboo have always given a nautical feel.

# TRI-POD AND CIRCA CHAIR

The Circa chair designed by Nick Rawcliff is unquestionably a chair that is a conversation starter in any location – a singular piece of circular furniture. By adjusting the positioning of the hoops, the carriage of the chair can be altered according to personal preference. The chair folds completely flat for easy stowage.

The Tri-Pod frame consists of three laminated poles, making it incredibly strong and capable of holding weights of over 300kg. The webbing strap and bamboo feet prevent the poles from splaying apart on hard ground, for soft ground you simply open the three poles the opposite way, so the angle of the pole ends dig into the ground.

Another feature of the tripod is that it has a stainless steel rotating hanging eye allowing you to effortlessly spin around 360 degrees.

# WHY ALUMINIUM?

- Unique, contemporary designs.
- All parts easily interchangeable.
- Highly resistant surface finishes.
- Low maintenance.
- Interlocking profiles to achieve extreme strength
- 5 year guarantee
- Patented designs and technology
- Sizes from 2 to 4 metres.
- Exemplary quality with a passion for design.
- 100% recyclable.

## Aluminium finial designs

The sail finial finishes off the nautical look of this range of parasols, as you can see the different parts of the parasol are shaped like the bow of a classic yacht.

Depending on which angle the finial is viewed from it looks like either a traditional finial or the sail of a yacht. The polished aluminium finish also reflects an interesting array of light and shade.

The oval finial shows the strength of structure and design, giving the illusion of a solid shape when it is actually made up of interlocking eliptacle plates. The polished aluminium finish reflects an interesting array of both light and shade.

# ALUMINIUM RANGE

For six years Bambrella® has been manufacturing the strongest natural parasols in the world made out of laminated bamboo, supplying some of the most prestigious hotels, drink companies, restaurants and retailers in over 30 different countries.

Due to demand from our exiting customers we have developed a brand new range of aluminium parasols which are as strong as the bamboo range with the same points of sale. **Wind tunnel tested up to 90 km/ph** with a three year guarantee easily replaceable parts and unique designs which sets them apart from the competition.

Rupert Bottomley the director of Bambrella® has been working on the designs of this range for three years and you can see the knowledge and eye for detail that has gone into this innovative new range of Bambrella parasols.

The Bambrella® Santa Ana range looks the same as the Hurricane range, the difference is it has a two piece pole allowing for easy transportation and the aluminium profiles are lighter.

All the parts are designed so they are easily interchangeable.

We have a choice of finals, made from cast aluminium which gives the final touch to this unique range of parasols.

The Santa Ana Side Wind is our range of small aluminium side pole umbrellas, manufactured and designed to exacting standards with durability, strength and style in mind - the three key points of Bambrella® products.

The side wind features a 360 degree rotating base and a 45 degree tilt so you can still find shade as the sun goes down. The base has adjustable feet for uneven surfaces whilst protecting the floor at the same time. We use a specialised type of polymer for the bearings meaning that they never seize up or rust.

This umbrella was designed for commercial and domestic use, bringing a magnificent focal point for any situation. We can also supply this parasol with a ground base.

# PARASOL COVERS

We offer several types of material with different qualities, which give a range of performance depending on the use and the budget to be specified.

## Spuncrylic®

Spuncrylic® is polyester that has gone through a process called solution dyeing, giving it very high resistance to fading from sunlight. Spuncrylic® also has good stain resistance and water repellence. In addition it has a UPF of at least 50. This material has a similar performance to acrylic but at a much more affordable price.

Forest Green  
SP/08046

Terracotta  
SP/08097

## Polyester

Polyester is a strong fiber that is resistant to creasing and keeps its shape well. The price is quite low in comparison to other umbrella cover materials with the only drawback being the colour fastness of the darker materials. This is why we only offer two natural colours in the polyester material.

Size:  
45cm x 45cm x 5cm

50kg grey concrete base with pullout handles.  
Size:  
diameter 60cm x 11cm

## Protective covers

All our covers come with an extension pole, which is fitted into a channel in the cover; this enables you to easily place the cover over the top of the Bambrella® while zipping it down for final protection and storage.

For the sidewind protective cover there are two extension poles so you can hook the cover over the entire canopy

## Bambrella® display racks

Our Bambrella display rack is the ideal way to store, promote and retail our laminated bamboo parasols.

## TV unit and leaflet holder

Two good marketing tools for retailers selling Bambrellas are the tv screen, showing the windtunnel test and the leaflet holder which can both clamp onto the umbrella pole.

## Spare covers

Bambrella® replacement covers are conveniently packaged and available in a variety of colours, materials, sizes and styles fitting all our Bambrella® parasols and others depending upon suitability.

## PRINTING

Bambrella® is a brand name known to supply eco friendly commercial parasols, so whether you are a large corporation or small company wanting to promote your brand, what better or more sustainable way is there to advertise than using Bambrella® parasols?

## BRANDING

All of our covers can be printed on with simple printed text of full colour company logos. For larger orders we screen print on the full roll of material before we cut out the shapes that make up the parasol cover, we call this full printing. This is perfect for advertising for businesses large or small. Our clients for printed parasols include drink companies, breweries, distilleries, wineries, coffee shops, restaurants, pubs, clubs and other companies from all different sectors who want to promote thier brand and quality in style.

# TABLETOPS

We supply a range of different table tops in three different shapes, round, rectangle and square. The table tops are made from triple laminated bamboo board, which has been treated for outdoor use, but can be also used indoors. The table tops have a thickness of 22mm, bespoke sizes can be manufactured to your specifications.

At Bambrella, we design and manufacture a wide variety of cushions which ensures an exact colour match to your parasol. We provide cushions for Chairs, Benches, Recliners, Outdoor Sofas, Scatter cushions and Sun-Loungers.

For Hotels, Pubs, Restaurants and Golf and Country Clubs, we can have your logo either embroidered or printed onto the cushions to further heighten your brand and image.

Our cushions can be made out of Polyester or Spuncrylic material and we also offer the option of the world renowned Sunbrella fabric with a wide range of different fillers according to your requirements. This makes them hardwearing, comfortable, resistant to fading and low maintenance.

Matching your cushions to your Parasol is unique to Bambrella®.

# LOCATION OF PARTS

A. Hub	J. Pole connector (Sirocco only)
B. Runner	K. Infinity underarm support bracket
