Italian Made Glassware

A Glass for Every Occasion

Parma, Italy, halfway between Bologna and Milan, has a glorious history that traces back to the Etruscans. Perhaps best known for its splendid architecture and its foods (especially the incomparable parmigiano reggiano cheeses and its prosciutto di Parma), the region is also a center of art and music, higher learning, and glassmaking, foremost the world's leading glassware manufacturer, Luigi Bormioli.

The company was founded in 1946 by Mr. Luigi Bormioli, who led it to international prominence. The Bormioli family continues his mission: a commitment to great design, traditional Italian craftsmanship and new-age glassmaking technology to create beautiful glassware of the highest quality. Luigi Bormioli rivals fine crystal in appearance and elegance, but is lead-free, affordably priced and widely available.

NEW

A collection of machine-blown stemware which is elegant, sophisticated, highly transparent and sparkling. The lightweight stemglasses have features typical of mouth-blown although sturdier and precise (faithful to specifications); manufactured in High-Tech Blown Lead Free Crystal Glass SON.hyx®.

VINEA™ collection is characterized by a captivating unique design as it combines classic shapes with more contemporary and functional ones. This collection is dedicated to the most important native (autochthonous) Italian vine varieties. The stemglasses have been designed through the use of correlated research and trials and subsequently tested by Centro Studi Assaggiatori using the Advanced Big Sensory Test® and the Analogic-Affective Big Sensory Test® to mark them out.

VINEA™ stemglasses best highlight the sensorial perceptions of each vine varieties emphasizing their organoleptic qualities. The shapes of all items in the VINEA™ collection differ from all the other stemglasses present on the market as the wine contained releases an "explosion" of all the characteristics flavors of the territory of origin while at the same time lessening the alcoholic elements in the aroma.

By doing so, connoisseurs and novices alike will find the taste and aroma enjoyable:
Taste the Difference.

The shapes and dimensions of the stemglasses are such as to:

- Lessen the perception of the alcoholic elements enhancing only the true aromas of the specific vine varieties.
- Balance the gustatory perceptions and aromatic elements; excellent mouthfeel.
- Make the aromatic perception intense and balanced.
- Allow the wine to have a slow and intense aeration without modifying the typical aromas.

Recent studies and research on VINEA™ stemglasses have once again confirmed that the wine changes its taste and aromas depending on the shape and dimension of the glass used.

Due to the unique design of the bowl, the aromas' diffusion has a "Ring effect"; the alcoholic elements concentrate outwards while the wine specific aromas will develop in central part of the bowl.

Such phenomena identified in VINEA™ stemglasses enhances both the wine's aromas and flavors without any interference with gaseous ethanol. Gaseous ethanol condenses partly on the walls of the bowl and partly vanishes toward the rim without affecting the olfactory evaluation.

supremo

wine ambassador

The stemglasses of the Supremo range have been designed by Bormioli Luigi's designers in collaboration with Centro Studi Assaggiatori (the international specialists of the wine sensorial analysis).

The stemglasses are produced in machine blown SON.hyx crystal glass and with a new process making them lighter and thinner while maintaining their strength.

The bowl shapes are innovative and elegant and have unique sensorial perceptions: emphasizing the wine's aromas during their development in the bowl while lessening the alcoholic element. In this way the wine's aromas and flavours develop pleasantly in the bowl.

After 10 minutes, all wines contained in a Supremo wine glass lose the alcoholic aroma elements while the wine's specific aromatic characteristics are enhanced to the fullest.

The stemglass design is suitable for specific wine varietals.

(1)

The chimney balances the wine aromas with a low alcoholic content and its cylindrical shape directs the wine to the centre of the tongue.

(2)

The conical shape condenses the alcoholic vapours so that in the aromatic chamber only the wine aromas will develop.

(3)

The smooth connection between the conical and convex shape avoids the breakage of the aromatic molecules during the wine swirling process.

(4)

The Convex surface enables a high wine oxidation on the surface (A) with a low oxidation underneath (B), retaining the most delicate aromas and facilitating their pleasant development.

(5)

Epicure (indentation) at the base of the bowl, shows the real wine colour reflection.

(6)

Permanent ultra break-resistant stem (Titanium reinforced).

The Vinoteque range of stemglasses has been designed to fully satisfy the 5 senses: sound, sight, smell, taste and touch.

Each wine has unique organoleptic properties and, for this reason, each wine must be served in a suitable stemglass in order to enhance its characteristics. The main function of Vinoteque stemglasses is to balance the sensations of each type of wine.

Their shape and dimensions are the result of studies and scientific research, on the organoleptic appreciation of aromas and on the physical conditions and characteristics that enables to enhance their perception.

VINOTEQUE, A WIDE RANGE OF PROFESSIONAL, ELEGANT AND ROBUST STEMGLASSES WITH HIGH SENSORIAL PERCEPTION FOR THE TASTING OF ALL KINDS OF WINES:

- Shapes and sizes designed as a result of scientific studies, to maximize the olfactory and taste perception of wines.
- Tested by **Centro Studi Assaggiatori** using the Advanced Big Sensory Test® and the Analogic-Affective Big Sensory Test®.
- Made in **TITANIUM Reinforced** High-Tech SON.hyx® Blown Crystal Glass with high resistance to breakages.

STEMGLASSES CHARACTERISTICS

The different shapes of the bowls:

- facilitate the rotation of the wine in the glass
- improve the balance of the different aromas in the head space.
- convey the aromatic molecules towards the nose (with the right concentration and balance).
- guide the wine towards specific areas of the tongue ensuring the appropriate amount of wine at every sip.
- guarantee the perfect contact between the lower lip and the rim of the bowl, avoiding annoying drops on the edge of the mouth.

SENSORY PERFORMANCES:

- Wine colour efficiency $\simeq 100\%$
- Olfactory perception $\simeq 100\%$
- Taste balance $\simeq 100\%$

Case Pack: 24

For young and aromatic grappa and fruit brandies.

The shape of the bowl considerably lowers the unpleasant aromatic perceptions, emphasising the floral and fruity aromatic notes. It gives a pleasant feeling in the mouth and an excellent aftertaste.

RECOMMENDED WINES:

Aromatic distillates
Young Grappa

a lesson in design

by accademia luigi bormioli

NEW

T-Glass™, an innovative stemless program with a functional design, maintaining the original bowl shape designed for wine tasting.

These glasses manufactured without stem, with a bowl suitable for the tasting of any wine varieties welded onto a foot (or base) have the advantage of being easy and safe to use.

- EASY to use. Suitable for casual dining occasions.
- EASY to wash, safer.
- EASY to store.
- EASY to hold. Holding it by the base it prevents heat transfer to the wine.
- EASY to handle, more durable.
- EASY and versatile, suitable also for non alcoholic drinks.

Ideal for an elegant and distinguished table setting, a range of stemware with high sensorial perception reducing wine flaws. The range has been developed applying scientific methods: shapes and dimensions guarantee the pleasantness of wine reducing to a minimum the wine flaws, if present. Tested by master Sommeliers, their sensory performances have been confirmed. The aromatic chamber (head space) has been developed to enhance only the specific aromas of the grape, aromas relevant to the vinification method and those due to the age of the wine.

The olfactory intensity of the aroma families:

Floral - Fruity - Vegetable - Spicy (including wooden and toasted aromas) are amplified, compared to standard stemware, whilst reducing unpleasant ones. The aromas are full, intense and renewed continuously.

The correct oxygenation index of these stemglasses reduces the acidic flavor and that of tannins resulting in a perfect taste balance.

For red wines we found balanced tactile-gustatory perceptions of the various flavours and sensations:

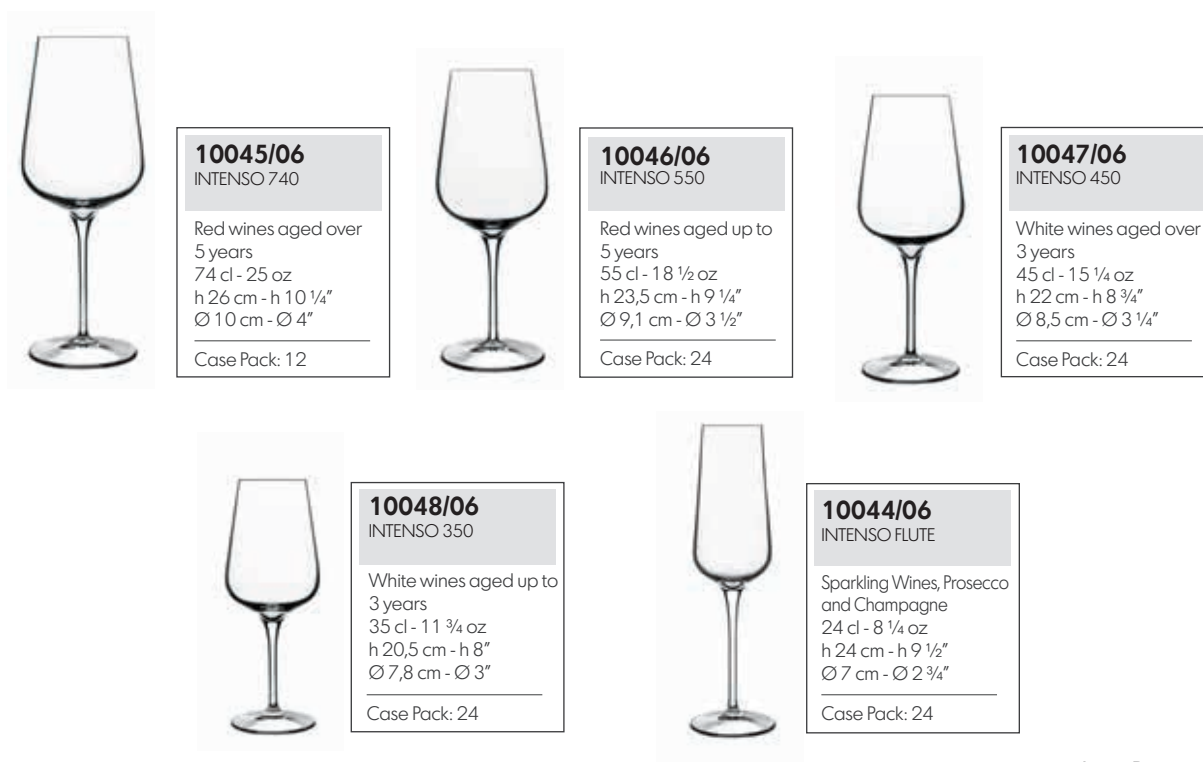

Acidity = fresh taste - Alcohol = moderate taste - Softness = round taste - Astringency = flowing taste

For white wines, since the astringency flavour is not present, we found an excellent balance amongst acidity, alcohol and softness.

After having swallowed the wine, the Intense Aromatic Persistence (I.A.P. = number of seconds during which the aromas persist) is very high over 11 seconds, typical of exceptional wine.

Each Intenso stemglass has been developed and named on the basis of the age of wine:

- INTENSO 740: All red wines aged up to 5 years
- INTENSO 550: All red wines aged over 5 years
- INTENSO 450: All white wines aged up to 3 years
- INTENSO 350: All white wines aged over 3 years
- INTENSO Flute: Spumante, Prosecco and Champagne

NEW

Discover how the quality of the glass, the shapes and design of Luigi Bormioli's products make the difference. BIRRATEQUE™ collection has been developed in collaboration with Centro Studi Assaggiatori (International specialists of sensory analysis). Every Beer Style has unique organoleptic characteristics, for this reason each specific Beer Style should be served in the appropriate glass so that all its organoleptic features will be emphasized.

The shapes and dimensions of this new glassware collection are the results of studies, research and tests:

- Glass shape and glass quality influence the colour, aroma and the taste of beer. The glass shape must match the Beer Style that is poured into it.
- The right glass will bring forward the true flavours of the beer.
- The internal volume of the glass must be greater than that of the beer poured into it in order to create an adequate aromatic chamber (Head Space).

Only in this way it will be possible to experience the true aromas of the beer. On the contrary, if the glass is filled up to the rim the aromatic molecules of the beer will drift out and vanish in the surrounding environment and its flavour will be distorted.

(1)

Suitable diameter of the rim to reduce the speed in which the beer is delivered into the mouth giving sufficient time to the taste buds to recognize the taste elements appropriately.

(2)

Laser-cut fine rim: 1.2 mm thickness avoids turbulence and guarantees a pleasant mouthfeel.

(3)

Chimney to balance the aromas.

(4)

Head Space (Aromatic Chamber)

(5)

Bowl shape incurved specifically for each Style of Beer to capture the right aromas.

(6)

Foam (Head): "aromatic conveyer" avoids the oxidation of beer without altering the level of bitterness.

(7)

Narrow stem: easy and pleasant to hold and it reduces heat transfer from hand to beer.

(8)

Base: Stable.

(9)

Foam Control System: Laser etched circle helps maintain a fine and persistent stream of bubbles replenishing the head and releasing the aromas at the same time.

Compact in its dimension yet with a characteristic shape it is a technical tasting instrument with a young and cute appearance.

Light and robust it is perfect both at home and for tasting events.

Its shape highlights the particular cider's flavours and aromas linked to sweetness such as fresh fruit and pastry emphasizing the foam firmness and the effervescence.

IDEAL FOR:

Cider
Hard Cider
Fruit Cider
Scrumpy
Pear

Case Pack: 24

NEW

Sized but sinuous, elegant and well balanced according to enthusiasts and experts this is the perfect instrument for the tasting of full-bodied craft beers.

Its shape makes it particularly discerning as it accentuates the specific flavours of dark beers: toasty malt, coffee, spices, caramel and dried fruit.

IDEAL FOR:

Baltic Porter
Irish Dry Stout
Milk Stout
Oatmeal Stout
Oyster Stout
Bock

Case Pack: 24

NEW

The style is futuristic and original, designed to impress. The solid grip gives importance and sense of strength while the dimension and the angular shape of the bowl concentrates and amplifies the aromas.

It enhances the floral and the fruity aromas typical of light seasonal craft beers, bringing out the sweetness and emphasizing the effervescence.

IDEAL FOR:

Kriek
Framboise
Bière De Garde
Holiday Spiced Beers

original double-wall single serving

Borosilicate glass is a material highly resistant to thermal shock and is dishwasher safe. Its chemical composition maintains, unadulterated, the level of acidity of any liquid or food contained.

The vacuum area between the two walls allows for thermal insulation and prevents condensation on the outer surface. As a result the temperature of hot liquid or food is maintained for longer than that of other materials such as porcelain or ceramic.

The same is applicable for cold liquids and food; the desired temperature is maintained for longer preventing the "sweating" effect on the table and hands.

- ▶ **DOUBLE WALL BOROSILICATE GLASS, HAND MADE.**
- ▶ **THERMAL SHOCK RESISTANT.**
- ▶ **MICROWAVE AND DISHWASHER SAFE.**
- ▶ **MAINTAINS THE TEMPERATURE OF BOTH DRINKS AND FOOD; HOT AND COLD.**
- ▶ **MAINTAINS, UNADULTERATED, THE LEVEL OF ACIDITY OF LIQUID/FOOD CONTAINED.**
- ▶ **PREVENTS CONDENSATION ON THE OUTER SURFACE.**

Strong & Durable - Made in France

The tempering process is our trademark.

Back in 1945, Durablex pioneered tempered glass technology, a process in which we are still the acknowledged specialist today. This special treatment, which consists of rapidly cooling molten glass previously heated to a temperature of around 1292°F, improves most of its physical qualities. Now able to resist a 266°F thermal shock, the resulting glass is 2.5 times stronger than annealed glass and is the same tempered glass used in windscreens! Could there be any more convincing proof of our expertise in this technology?

Skills & expertise that set the benchmark

From raw materials to packaging, everything is 100% produced and manufactured in France. The skills of our people have made our brand internationally famous for its virtually unbreakable products and refined, timeless style. Our ability to respond to the market is clearly appreciated worldwide, given that 85% of our production is sold in export markets. We have been providing industrial solutions to meet the tableware needs of our customers for over 70 years.

STRONG AND DURABLE!

If your glassware breaks less frequently, it means you don't have to buy it so often! In a world with an increasing appetite to return to non-disposability and to value durability, Durelex products remain the gold standard. We have always designed our products and our business for the long term, and sought to minimise our impact on the environment at every stage of the product lifecycle.

"DURA LEX, SED LEX"

The law is tough, but it is the law. This law applies equally to high-quality products subject to extreme conditions of heating and cooling to create a material of proven and exceptional strength. Durelex tempering technology may be 70 years old, but it has never been equalled. So beware of imitations!

J'❤
DURA LEX!

"What I love about the Durelex tumbler is that it has a knack to suit any occasion. A beautiful long macchiato coffee feels just as much at home as a tumbler of chilled vintage champagne. I also love that the durability allows them to be used in a high octane commercial hospitality situation with practically nil breakage. But most of all, it's the way they fit and feel so comfortable in your hand which seems to create this feeling of fun and informality. As far as drinking vessels of the world go, the Durelex tumbler is my everyday, every occasion, glass of choice."
